

St John's RC School

E Safety Policy

Date of policy: March 2017

Signed by Chair of Governor..... Date

Next review date: March 2019

Background

New technologies have become integral to the lives of children and young people in today's society, both within schools and in their lives outside school.

The internet and other digital and information technologies are powerful tools, which open up new opportunities for everyone. Electronic communication helps teachers and students learn from each other. These technologies can stimulate discussion, promote creativity and increase awareness of context to promote effective learning. Students and staff at St John's should have an entitlement to safe internet access at all times.

The requirement to ensure that the students are able to use the internet and related communications technologies appropriately and safely is addressed as part of the wider duty of care to which all who work in schools are bound. A school e-safety policy should help to ensure safe and appropriate use. The development and implementation of such a strategy should involve all involved in the students' education from the head teacher and governors to the senior leaders and teachers, support staff, parents, members of the community and the students themselves.

The use of these exciting and innovative tools in school, and at home, have shown to raise educational standards and promote student achievement. However, the use of these new technologies can put young people at risk within and outside the school. Some of the dangers they may face include:

- Access to illegal, harmful or inappropriate images or other content
- Unauthorised access to / loss of / sharing of personal information
- The risk of being subject to grooming by those with whom they make contact on the internet.
- The sharing / distribution of personal images without an individual's consent or knowledge
- Inappropriate communication / contact with others, including strangers
- Cyber-bullying
- Access to unsuitable video / internet games
- An inability to evaluate the quality, accuracy and relevance of information on the internet
- Illegal downloading of music or video files
- The potential for excessive use which may impact on the social and emotional development and learning of the young person.

Many of these risks reflect situations in the off-line world and it is essential that this e-safety policy is used in conjunction with other school policies (e.g. behaviour and child protection policies).

As with all other risks, it is impossible to eliminate those risks completely. It is therefore essential, through good educational provision to build students resilience to the risks to which they may be exposed, so that they have the confidence and skills to face and deal with these risks.

The school must demonstrate that it has provided the necessary safeguards to help ensure that they have done everything that could reasonably be expected of them to manage and reduce these risks. The e-safety policy that follows explains how we intend to do this, while also addressing wider educational issues in order to help the students (and their parents / carers) to be responsible users and stay safe while using the internet and other communications technologies for educational, personal and recreational use.

Scope of the policy

This policy applies to all members of the school community (including staff, pupils, volunteers, parents / carers, visitors, community users) who have access to and are users of school ICT systems, both in and out of school.

The Education and Inspections Act 2006 empowers head teachers, to such extent as is reasonable, to regulate the behaviour of students when they are off the school site and empowers members of staff to impose disciplinary penalties for inappropriate behaviour. This is pertinent to incidents of cyber-bullying or other e-safety incidents covered by this policy, which may take place out of school, but is linked to membership of the school.

The school will deal with such incidents within this policy and associated behaviour and anti-bullying policies and will, where known, inform parents / carers of incidents of inappropriate e-safety behaviour that take place out of school.

A log should be kept of all reported misuse of technology within the school

Roles of the E-Safety coordinator

The E-Safety coordinator is the Associate Head Teacher who:

- takes day to day responsibility for e-safety issues and has a leading role in establishing and reviewing the school e-safety policies / documents
- ensures that all staff are aware of the procedures that need to be followed in the event of an e-safety incident taking place.
- liaises with school ICT technical staff
- receives reports of e-safety incidents and creates a log of incidents to inform future e-safety developments,
- reports incidents to the head teacher

ICT Technician

The ICT Technician is responsible for ensuring:

- that the school's ICT infrastructure is secure and is not open to misuse or malicious attack
- that the school meets the e-safety technical requirements;
- that users may only access the school's networks through a properly enforced password protection policy, in which passwords are regularly changed
- that he keeps up to date with e-safety technical information in order to effectively carry out their e-safety role

ICT Coordinator

The ICT Coordinator is responsible for

- Keeping up to date with e-safety issues and reporting to the ICT technician any concerns or changes that need to be made;
- Informing staff of known e-safety issues

Teaching and support staff

Teaching and support staff are responsible for ensuring that:

- they have an up to date awareness of e-safety matters and of the current school e-safety policy and practices;
- they have read, understood and signed the school Staff Acceptable Use Policy;
- they report any suspected misuse or problem to the Head Teacher / ICT Co-ordinator / class teacher for investigation / action / sanction;
- digital communications with students (email) should be on a professional level and only carried out using official school systems;
- E-safety issues are embedded in all aspects IT at all times including in lessons, extra-curricula activities and extended school activities;
- they are aware of e-safety issues related to the use of mobile phones, cameras and hand held devices and that they monitor their use and implement current school policies with regard to these devices;
- in lessons where internet use is pre-planned students should be guided to sites checked as suitable for their use and that processes are in place for dealing with any unsuitable material that is found in internet searches.

Designated person for child protection

The designated person for child protection should be trained in e-safety issues and be aware of the potential for serious child protection issues to arising from:

- sharing of personal data
- access to illegal / inappropriate materials
- inappropriate on-line contact with adults / strangers
- potential or actual incidents of grooming
- cyber-bullying

Students (according to ability):

- are responsible for using the school ICT systems in accordance with the students' Acceptable Use Policy, which they will be expected to sign, where appropriate before being given access to school systems.
- need to understand the importance of reporting abuse, misuse or access to inappropriate materials and know how to do so;
- will be expected to know and understand school policies on the use of mobile phones, digital cameras and hand held devices. They should also know and understand school policies on the taking / use of images and on cyber-bullying.
- should understand the importance of adopting good e-safety practice when using digital technologies out of school and realise that the school's E-Safety Policy covers their actions out of school.

Parents/carers

Parents/carers play a crucial role in ensuring that their children understand the need to use the internet / mobile devices in an appropriate way. Research shows that many parents and carers do not fully understand the issues and are less experienced in the use of ICT than their children. The school will therefore take every opportunity to help parents understand

these issues through parents' evenings, newsletters, letters, website/ national and local e-safety campaigns / literature. Parents and carers will be responsible for endorsing (by signature) the Students Acceptable Use Policy

Education

Whilst regulation and technical solutions are very important, their use must be balanced by educating students to take a responsible approach. The education of students in e-safety is therefore an essential part of the school's e-safety provision. Students need the help and support of the school to recognise and avoid e-safety risks and build their resilience. E-Safety education will be provided in the following ways:

- A planned e-safety programme should be provided as part of ICT / PHSE / other lessons and should be regularly revisited – this will cover both the use of ICT and new technologies in school and outside school;
- Students should be taught in all lessons to be critically aware of the materials / content they access on-line and be guided to validate the accuracy of information;
- Students should be helped to understand the need and encouraged to adopt safe and responsible use of ICT, the internet and mobile devices both within and outside school according to ability.
- Staff should act as good role models in their use of ICT, the internet and mobile devices

Education of Parents/carers

Many parents and carers have only a limited understanding of e-safety risks and issues, yet they play an essential role in the education of their children and in the monitoring / regulation of the children's on-line experiences. Parents often either underestimate or do not realise how often children and young people come across potentially harmful and inappropriate material on the internet and are often unsure about what they would do about it. There is a generational digital divide. St. John's will seek to provide information and awareness to parents and carers through, Letters, newsletters, web site,

Technical infrastructure, equipment and monitoring

The school will be responsible for ensuring that the school infrastructure / network is as safe and secure as is reasonably possible and that policies and procedures approved within this policy are implemented. It will also need to ensure that the relevant people named in the above sections will be effective in carrying out their e-safety responsibilities

- Users will be made responsible for the security of their username and password in relation to emails, must not allow other users to access the systems using their log on details and must immediately report any suspicion or evidence that there has been a breach of security.
- The school has a filtering service which is maintained by the ICT technician
- Any filtering issues should be reported immediately to the ICT coordinator.
- School ICT technical staff regularly monitor and record the activity of users on the school ICT systems and users are made aware of this in the Acceptable Use Policy
- Appropriate security measures are in to protect the servers, firewalls, routers, wireless systems, work stations, hand held devices etc. from accidental or malicious attempts which might threaten the security of the school systems and data.

Curriculum

E-safety should be a focus in all areas of the curriculum and staff should reinforce e-safety messages in the use of ICT across the curriculum.

- Where students are allowed to freely search the internet, e.g. using search engines, staff should be vigilant in monitoring the content of the websites the young people visit.
- It is accepted that from time to time, for good educational reasons, students may need to research topics (e.g. racism, drugs and discrimination) that would require access to sites which are blocked. In such a situation, staff can request that the ICT Coordinator (and other relevant person) can temporarily remove those sites from the filtered list for the period of study. Any request to do so, should be auditable, with clear reasons for the need.
- Students depending on ability should be taught in all lessons to be critically aware of the materials / content they access on-line and be guided to validate the accuracy of information

Use of digital video images

The development of digital imaging technologies has created significant benefits to learning, allowing staff and students instant use of images that they have recorded themselves or downloaded from the internet. However, staff and students need to be aware of the risks associated with sharing images and with posting digital images on the internet. Those images may remain available on the internet forever and may cause harm or embarrassment to individuals in the short or longer term.

- When using digital images, staff should inform and educate students about the risks associated with the taking, use, sharing, publication and distribution of images. In particular they should recognise the risks attached to publishing their own images on the internet e.g. on social networking sites.
- Staff are allowed to take digital / video images to support educational aims. Images should only be taken on school equipment; the personal equipment of staff should not be used for such purposes.
- Care should be taken when taking digital / video images that pupils are appropriately dressed and are not participating in activities that might bring the individuals or the school into disrepute.
- Students must not take, use, share, publish or distribute images of others without their permission
- Photographs published on the website, or elsewhere that include students will be selected carefully and will comply with good practice guidance on the use of such images.
- Students' full names will not be used anywhere on a website or blog, particularly in association with photographs.
- Written permission from parents or carers will be obtained before photographs of students are published on the school website.

Data protection

Personal data will be recorded, processed, transferred and made available according to the Data Protection Act 1998 which states that personal data must be:

- Fairly and lawfully processed
- Processed for limited purposes
- Adequate, relevant and not excessive
- Accurate
- Kept no longer than is necessary
- Processed in accordance with the data subject's rights
- Secure

- Only transferred to others with adequate protection.

Staff must ensure that they:

- At all times take care to ensure the safe keeping of personal data, minimising the risk of its loss or misuse.
- Use personal data only on secure password protected computers and other devices, ensuring that they are properly "logged-off" at the end of any session in which they are using personal data.

The storing of personal data is strictly prohibited on portable computer systems, USB sticks or any other removable media. Work involving personal data will be carried out through the remote access procedure.

Communications

A wide range of rapidly developing communications technologies has the potential to enhance learning. The following table shows how the school currently considers the benefit of using these technologies for education outweighs their risks / disadvantages:

	Staff & other adults				Students			
	Allowed	Allowed at certain times	Allowed for selected staff	Not allowed	Allowed	Allowed at certain times	Allowed with staff permission	Not allowed
Communication Technologies								
Mobile phones may be brought to school	✓				✓			
Use of mobile phones in lessons				✓			✓	
Use of mobile phones in social time	✓							✓
Taking photos on personal mobile phones or other camera devices				✓				✓
Use of hand held devices e.g. PDAs, I pads etc.	✓				✓			
Use of personal email addresses in school, or on school network		✓						✓
Use of school email for personal emails				✓		✓		
Use of chat rooms / facilities				✓				✓

Use of instant messaging		✓					✓
Use of social networking sites			✓				✓
Use of blogs				✓			✓

When using communication technologies the school considers the following as good practice:

- The official school email service may be regarded as safe and secure and is monitored. Staff and students should therefore use only the school email service to communicate with others when in school, or on school systems
- Users need to be aware that email communications may be monitored
- Users must immediately report, to the nominated person – in accordance with the school policy, the receipt of any email that makes them feel uncomfortable, is offensive, threatening or bullying in nature and must not respond to any such email.
- Any digital communication between staff and students or parents /carers (email, chat, etc.) must be professional in tone and content. These communications may only take place on official (monitored) school systems. Personal email addresses, text messaging or public chat / social networking programmes must not be used for these communications.
- Whole class or group email addresses can be used and will be provided for individual students for educational use.
- Students should be taught about email safety issues, such as the risks attached to the use of personal details. They should also be taught strategies to deal with inappropriate emails and be reminded of the need to write emails clearly and correctly and not include any unsuitable or abusive material.
- Personal information should not be posted on the school website and only official email addresses should be used to identify members of staff.

Unsuitable/inappropriate activities

The school believes that the activities referred to in the following section would be inappropriate in a school context and that users, as defined below, should not engage in these activities in school or outside school when using school equipment or systems. The school policy restricts certain internet usage as follows:

Users shall not visit Internet sites, make, post, download, upload, data transfer, communicate or pass on, material, remarks, proposals or comments that contain or relate to;

- promotion or conduct of illegal acts, e.g. under the child protection, obscenity, computer misuse and fraud legislation.
- adult material that potentially breaches the Obscene Publications Act in the UK.
- criminally racist material in UK
- pornography
- promotion of any kind of discrimination
- promotion of racial or religious hatred
- threatening behaviour, including promotion of physical violence or mental harm
- any other information which may be offensive to colleagues or breaches the integrity of the ethos of the school or brings the school into disrepute
- using school systems to run a private business
- use systems, applications, websites or other mechanisms that bypass the filtering or other safeguards employed by the school
- uploading, downloading or transmitting commercial software or any copyrighted materials belonging to third parties, without the necessary licensing permissions
- revealing or publicising confidential or proprietary information (e.g. financial / personal information, databases, computer / network access codes and passwords)
- threatening behaviour, including promotion of physical violence or mental harm

- creating or propagating computer viruses or other harmful files
- carrying out sustained or instantaneous high volume network traffic (downloading / uploading files) that causes network congestion and hinders others in their use of the internet
- On-line gaming or gambling

Appendix 1

Parent/Carer Acceptable Use Policy Agreement

New technologies have become integral to the lives of children and young people in today's society, both within schools and in their lives outside school. The internet and other digital information and communications technologies are powerful tools, which open up new opportunities for everyone. These technologies can stimulate discussion, promote creativity and stimulate awareness of context to promote effective learning. Young people should have an entitlement to safe internet access at all times.

This Acceptable Use Policy is intended to ensure:

- that young people will be responsible users and stay safe while using the internet and other communications technologies for educational, personal and recreational use.
- that school ICT systems and users are protected from accidental or deliberate misuse that could put the security of the systems and users at risk.
- that parents and carers are aware of the importance of e-safety and are involved in the education and guidance of young people with regard to their on-line behaviour.

The school will try to ensure that students will have good access to ICT to enhance their learning and will, in return, expect the students to agree to be responsible users. A copy of the Student Acceptable Use Policy is attached to this permission form, so that parents / carers will be aware of the school expectations of the young people in their care.

Parents are requested to sign the permission form below to show their support of the school in this important aspect of the school's work.

Permission Form

As the parent / carer of the student named below, I give permission for my son / daughter to have access to the internet and to ICT systems at school.

I know that my son / daughter has signed an Acceptable Use Agreement where appropriate and has received, or will receive, e-safety education to help them understand the importance of safe use of ICT – both in and out of school.

I understand that the school will take every reasonable precaution, including monitoring and filtering systems, to ensure that young people will be safe when they use the internet and ICT systems. I also understand that the school cannot ultimately be held responsible for the nature and content of materials accessed on the internet and using mobile technologies.

I understand that my son's / daughter's activity on the ICT systems will be monitored and that the school will contact me if they have concerns about any possible breaches of the Acceptable Use Policy.

I will encourage my child to adopt safe use of the internet and digital technologies at home and will inform the school if I have concerns over my child's e-safety.

Appendix 2

Students Acceptable Use Policy If applicable

School policy

New technologies have become a part of our lives in and outside of school. Young people should have an entitlement to safe internet access at all times.

This Acceptable use policy is intended to help

- young people to become responsible users and stay safe while using the internet and other communications and ensure that the school's ICT system is safe.

The school will try to ensure that students have good access to ICT to help with their learning and will, in return, expect the students to agree to use the computers within the rules.

I will agree to;

- **I will follow the rules to keep myself safe at school and home when I am on the internet.**
- **I will tell an adult if I see or read something I do not like.**
- **I will tell an adult if I am asked for my name, address or information about me.**
- **I will respect other people's feelings and be kind when using the computer and the internet.**
- **I will respect the school equipment.**
- **I understand that if I bring a mobile phone or other portable equipment into school – I will hand it in to my teacher**
